## Highlights

**Award-winning**
Won the King of Spain and the
Red Cross prizes in 2017

**Fake News**
Edited a sci-fi and fantasy satirical
newspaper with +50 collaborators
for three years

I code Typescript, run meetings, integrate teams, set up projects, do tests, write documentation, and drink tea. I'm a proud generalist in love with **development**, **design** and **communication**.

## Accomplishments

- Eight years of experience **consulting** and **developing** websites, applications, and services;

- Headed the development of the HUK Autoservice web app from **initial steps** to **MVP**, then supported continued development until today;

- Integrated HUK's backend, frontend, design, and product teams applying **communication skills** and **Agile management** techniques;

- Was the **tech lead** for the Vibe web app, an HR application that helps companies manage their collaborators in a **performance-driven** approach;

- **Started** the project of the livestock management **mobile application** for the startup Databoi;

- **Designed** and **developed** award-winning publications at Latin America's biggest newspaper, solving particular technological challenges;

- Created **internal tools**, solved workflow problems, and applied Agile management techniques to **optimise** the newspaper team's work.

- Speaks fluent English, native Brazilian Portuguese, and A2 German.
